

1

DeFi is a groundbreaking financial system built on blockchain technology, removing intermediaries like banks and enabling users to access financial services.

Airdrops—free token distributions—reward early adopters and participants, aligning community interests with protocol success and driving user growth.

However, the process of airdrop farming remains inaccessible to many due to its complexity and resource requirements.

The Problem

Airdrop farming is challenging for the average user, despite being one of the safest and most rewarding practices in the unpredictable crypto world. Barriers include:

Time and Expertise

Navigating DeFi ecosystems requires technical knowledge and significant time investment.

High Opportunity Costs

Capital is often locked for extended periods, making careful project selection essential.

Accessibility

Many everyday investors struggle to capitalize on this lucrative opportunity.

6.8M

Total Unique Wallets

91K

Wallets Claimed \$HYPE Airdrop

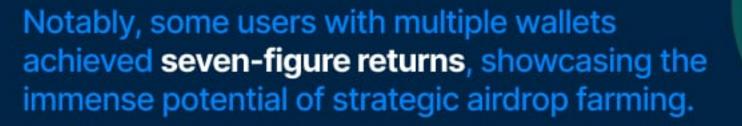

Only 1.38% wallets were farming and eligible for the largest airdrop in crypto history.

Avg. value per wallet at ~\$4 launch price

\$82K

Avg. value per wallet at current~\$25 price

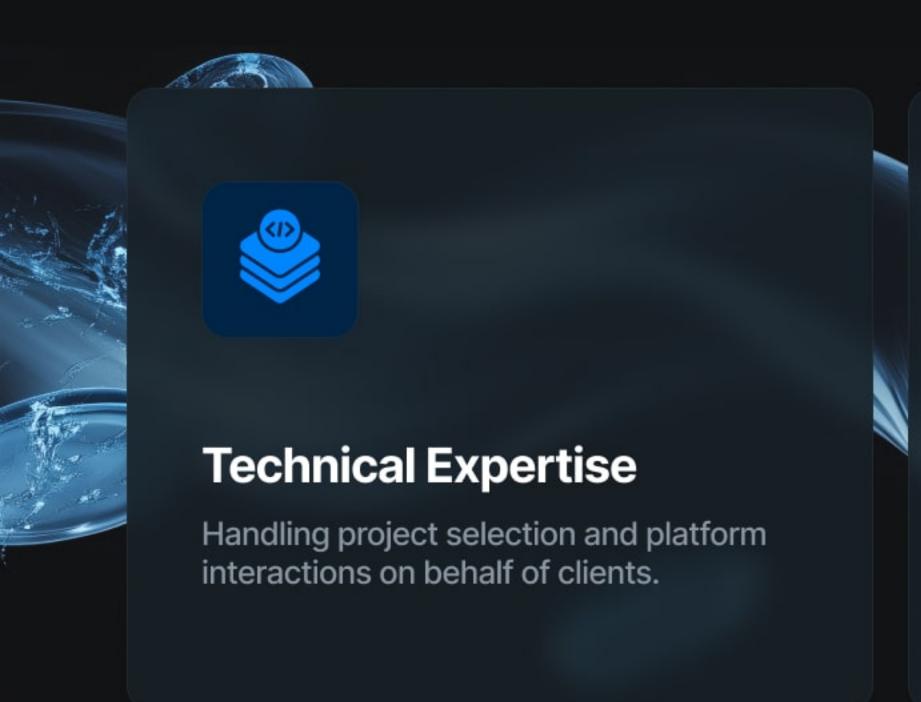

Our Solution

Naoki Farming bridges the gap, removing the common pain points of airdrop farming. We provide:

Proven Strategies

Leveraging a track record of profitable airdrop farming with minimal capital.

Minimized Risk

Allocating capital to stable assets and ETH, ensuring stable returns through liquid staking providers.

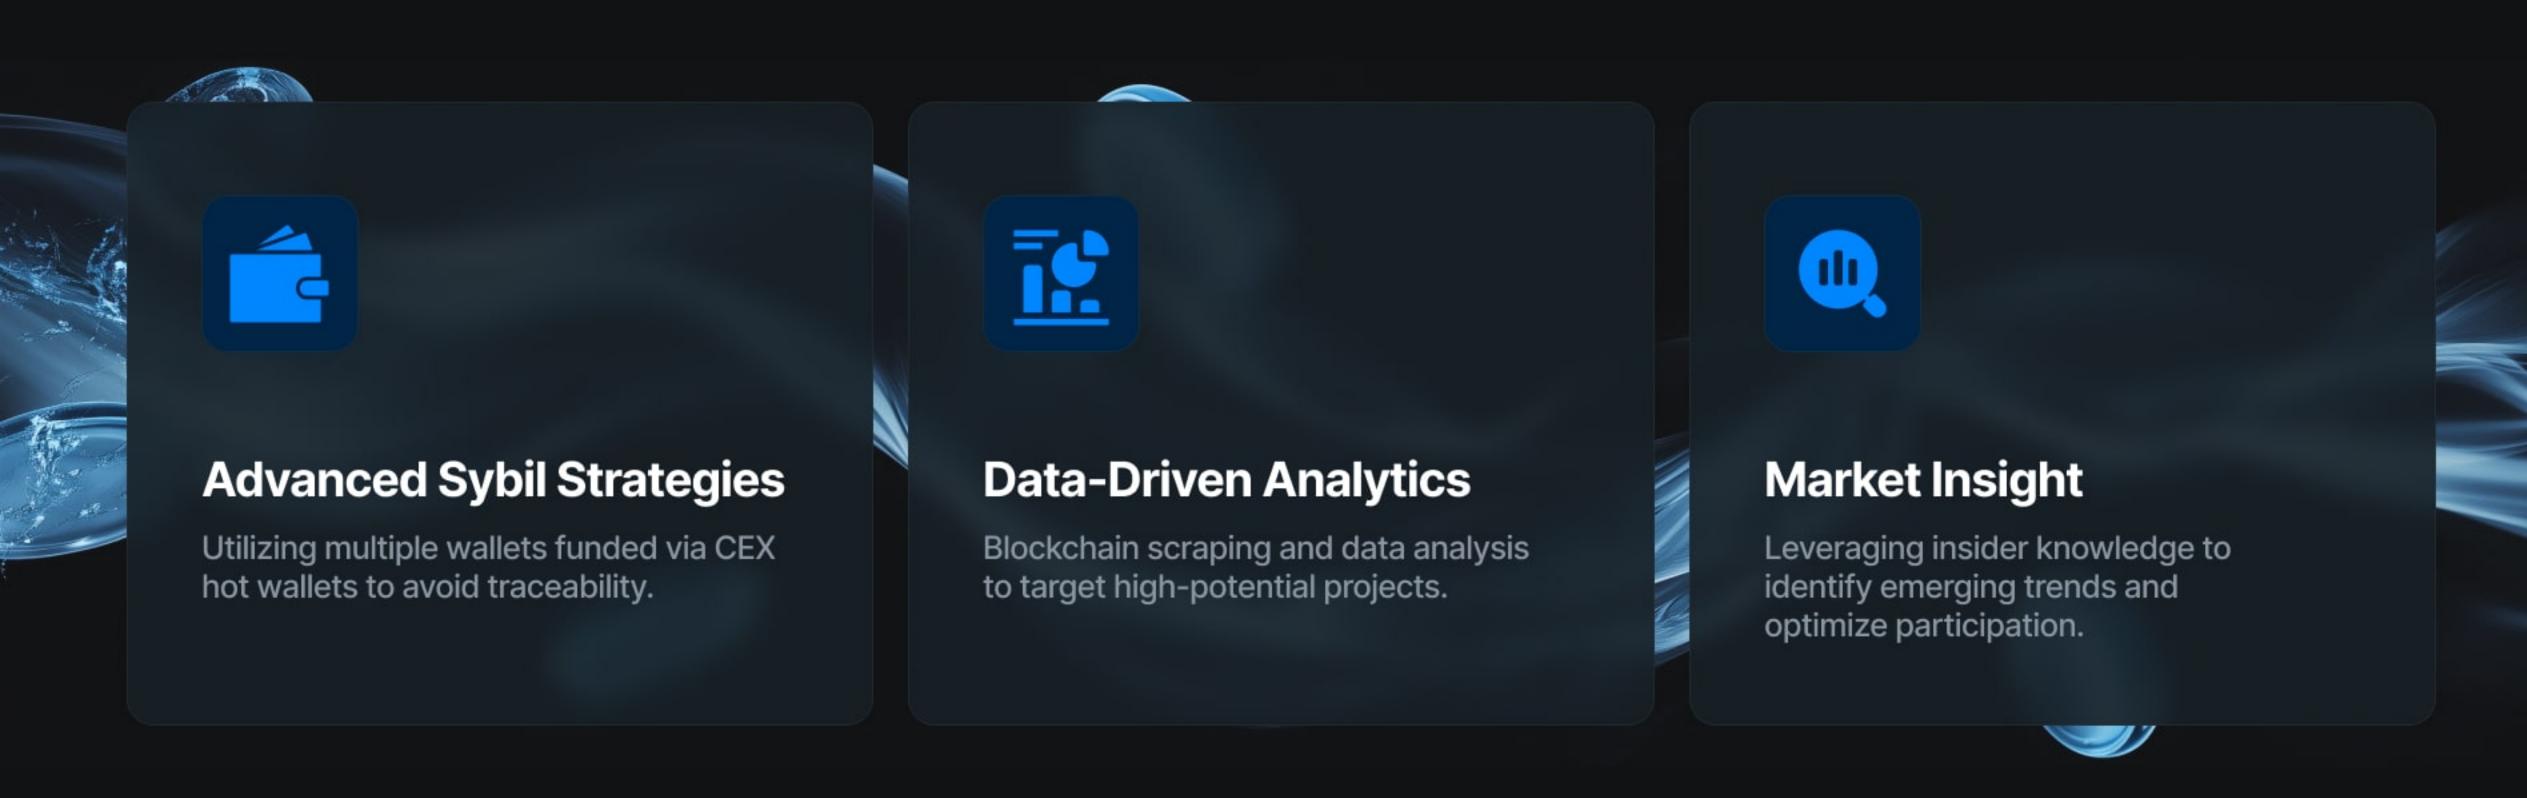

Our Technical Edge

Airdrop farming demands a highly specialized skill set.

At Naoki Farming, we combine:

Performance and Expectations

We stay on top of emerging opportunities in the airdrop space. Among other successes, for example, we called the Hyperliquid drop a year before it happened, as well as the SAGA and Polymarket drops.

Additionally, we rely on precise calculations for ongoing points farming, as demonstrated in the EigenLayer and Ether.fi case.

More details and examples are available upon request.

Case Study: Eigen Layer & Ether.fi Points

	Daily Emissions	60M points	Points emitted daily by EigenLayer.
	TVL	ЗМ ЕТН	Estimated total value locked.
	Points Earned per ETH	20 points/day	Points earned daily for each ETH staked.
	Staking Period	58 days	Duration of the example calculation.
	Points Earned	2M points	Points earned for 1,800 ETH over 58 days.
	Market Price per Point	\$0.33	Approximate point value on whales market.
Ľ	Profit	122 ETH (Eigen)	\$690K in profits from Eigen points alone.
	Ether.fi Points Earned	3k points/day	Additional points earned through Ether.fi.
	Total Points (Ether.fi)	313M points	Points accumulated over 60 days of restaking.
	Market Price per Point	\$0.0007	Estimated OTC price for Ether.fi points.
die.	Profit (Ether.fi)	70 ETH	Equivalent to \$220K from Ether.fi points.

Scaling 2025

Investing in Naoki Farming provides a rare opportunity to capitalize on an emerging and highly profitable market.

As early investors, you benefit from minimal competition, untapped potential, and the strategic expertise we bring to scale operations in this rapidly growing space.

First-Mover Advantage

Gain early entry into a high-growth sector poised to become mainstream.

Proven Profitability

Benefit from our consistent track record of securing high-value airdrops

We aim to raise (redacted), with a (redacted) deposit fee.

Strategic Scalability

Your investment enables us to scale operations, increasing returns by capturing more opportunities.

Emerging Market

Positioned to lead in an expanding market, leveraging expertise and data-driven strategies.

The Team 2025

The Team

With a vision to make airdrop farming accessible and profitable, Naoki Farming combines expertise and innovative strategies to create value for all stakeholders.

Expansion Plans

The purpose of this raise is to expand our team rapidly to capture the market while it remains untapped. With additional resources, we aim to secure top talent and scale operations to maximize returns for investors.

(Redacted)

Founder & Lead Strategist

Proven track record in DeFi and airdrop farming. Internship with a leading crypto influencer (2023 – present) and Head of Product at Jigsaw Finance (2024 – present).

Focus: Strategic leadership, project execution, and scaling operations.

Co-Founder, Crypto & Web3 Analyst

Experienced Web3 analyst and early-stage investor with a keen eye for identifying high-growth opportunities.

Focus: Market analysis, opportunity evaluation, and early-stage farming strategies.

Thank you!

Airdrop farming is a unique opportunity for those who wish to earn from DeFi with reduced risk.

Naoki Farming is your partner in unlocking this potential, combining technical expertise, transparency, and a proven strategy to maximize rewards while minimizing barriers.
